MANY RUMORS AS TO DALY-WEST

Director Treats Them as Baseless-Meeting Monday.

NAILDRIVER ASSESSMENT

FREE GOLD FOUND IN ROCK FROM FREIBURG.

Daly-West company, stated yesterday that in order to give President J. E. Bamberger time to reach home, the Bamberger time to reach home, the regular monthly meeting of the directors would be postponed until next Monday, May 9. Questioned on the probabilities of a reduction in the dividend and the likelihood of a statement being made to the shareholders, Mr. Wood said:

"I have no right to anticipate what will be done at the meeting, so it is useless for me to talk about it. Mr. Bamberger has sent word that he will be home by the 9th, so it has been decided to await his coming before holding a meeting."

There has been considerable street talk to the effect that some of the directors would hand in their resignations at the coming meeting, but Mr. Wood declared that he had heard not a single word concerning anything of the kind and had no disposition to the following the sale day is set for June 20. For several weeks past it has been understood that the levy would be made directly after the first of the present month, and shareholders who have kept in touch with operations at the property have been prepared for it.

Manager C. L. Rood authorizes the statement that on the day following the statement that on the first of the present month and shareholders who have kept in touch with operations at the property have been prepared for it.

Manager C. L. Rood authorizes the statement that on the day following the statement that on the first of the present month and shareholders who have kept in touch with operations at the levy would be made directly after the first of the p

a single word concerning anything of the kind and had no disposition to pay attention to stock market rumors and stories emanating from obscure and unauthoritative sources. Told that there was talk of Superintendent Kirby resigning, Mr. Wood stated:

"Thave heard nothing of it. In con-

Discovery by Claim Owners.

Previous to his departure for the orth Monday, John Jones, the Goldfield

could not be given, as it was the in-ention to form a corporation covering Shareholders Re-elected the Old Offi-

Those ledges will now receive particular attention.

GEOLOGY OF THE PARK.

Boutwell's Second Contribution on the Subject Is Out.

The results to date of the detailed study of the economic geology of the Park City mining district, conducted by J. M. Boutwell and J. D. Irving, have just been made public in a volume of contributions to economic geology is said by the interior department. A few months ago Mr. Boutwell and J. D. Irving, have just been made public in a volume of contributions to economic geology is said by the interior department. A few months ago Mr. Boutwell and J. D. Irving, have just been made public in a volume of the Alla-Peruvian Minias & Milling to the economic geology is said by the interior department. A few months ago Mr. Bouttwell said or contributions to recomment the property of the comparison in the capture of the comparison is graved, and the property will be resumed just as soon as it is possible to get supplies up to the comparison of the capture of the interior department. A few months ago Mr. Bouttwell said of the property of the comparison is graved to the interior department. A few months ago Mr. Bouttwell said in the state of the few property of the comparison is graved to the interior department ago may have been filed with the country of the capture of the comparison in the capture of the interior department and the property of the comparison in the capture of the interior department and the property will be resumed just as soon as it is possible to get supplies up to the comparison of the capture of the interior department and the property will be resumed just as soon as it is possible to get supplies up to the comparison of the capture of the interior department and the will be a month or so yet. The will be a month or so yet. The report of the few property will be resumed just as soon as it is possible to get supplies up to the comparison of the capture of the threat of the t

brief, generalized form much additional information regarding the district acquired later.

"Before final conclusions can be reached." Mr. Boutwell says, "much correlation and systematic office study of the material gathered will be required." Under the general heading of "Areal Geology," the sedimentary rocks, metamorphic rocks and structure is described, under "Economic Geology," the grade of ores, occurrence of ores, exploitation, recent industrial of the other hand, Sacramento, Star of the only stocks to show any strength or choson and perturn of cannot head a conclusions can be reached." Under the general heading of "Areal Geology," the sedimentary rocks, metamorphic rocks and structure is described, under "Economic Geology," the grade of ores, occurrence of ores, exploitation, recent industrial of the other hand, Sacramento, Star other hands are the other hand, Sacramento, Star other hands are the other hand, Sacramento, Star other hands are the other hands

NAILDRIVER ASSESSES. Ten Per cent Stock Dividend Will Be Declared Next Month.

resigning, Mr. Wood stated:

"I have heard nothing of it. In conversation with Mr. Kirby only a day or two ago over operations at the mine, he told me he was very anxious to go out and see how everything looked and, though he has been out of the hospital only a few days, I believe he would have gone to camp before this had I not insisted that he should do nothing of the kind until his strength had fully returned. His anxiety to get into the mine again does not look as though he intended quitting, does it?"

While outsiders profess to be worried over what is going to happen in the Daly-West, there is nothing in he demeanor or actions of the officers and directors to show that they are at all disturbed over the outlook for the future and it begins to look as though there would be a clearing of the atmosphere when the directors get together next week.

WANTED A LEASE BADLY.

Goldfield Man's Persistency Caused Discovery by Claim Owners.

Previous to his departure for the

He was fold, of course, that a lease TONOPAH ANNUAL MEETING.

cers and Directors. cers and Directors.

The matter was passed up and for the time forgotten. Later in the day Jones and Lloyd met again and the former renewed his proposition to lease the gold claims. He went after it the third time and when leaving for Helena said he might come back and try them again.

His persistency, coupled with the fact that he had remarked while examining the samples that the rock closely resembled the high-grade ore of Gold-field, led some of those who were present when he inspected the ore to examine it more closely themselves. It was then that a speck of free gold was discovered and for the first time the owners began to realize that the rock was washed off.

Then a hunt for more particles of free gold began and in less than a min-first manufaction. Dry and Wet Mill for a proposition to lease the time forgotten. Later in the day Jones and Lloyd met again and the former renewed his proposition to lease the gold claims. He went after it the third time and when leaving for Helena said the meeting had been heid and the meeting had been heid and that the old officers and directors had the directors had the dispatch stated that the gathering was largely attended and that the old officers of the report, Mr. Miller said, would be mailed shortly, John West weakened to 32.

What the reports submitted at the meeting said the samples of the company is headquarters, it is safe to say that the exhibit was far better than he sarrivate dispatch, but from reports which law the company is headquarters, it is safe to say that the exhibit was far better than he burlap lint that had accumulated on the surface of the rock was washed off.

Then a hunt for more particles of free gold began and in less than a min-

blown out of the porous from "blow holes" and the burlap lint that had accumulated on the surface of the rock was washed off.

Then a hunt for more particles of free gold began and in less than a minute it was found that much of the rock contained a large amount of it. When the rock was fractured some of the surfaces were found to be plastered with it, while every pin hole and ragged surface disclosed minute particles of the preclous stuff. The secret of why Jones was anxious for a lease was out and the owners of the property had learned that what they had conceived to be the making of a fine milling proposition was probably a high-grade one.

The ledge from which the samples were taken was described as being about four feet thick and one of a number that run through a big mountain separated by thin porphyry dykes. Those ledges will now receive particular attention.

WEW GOLD-SAVING PROCESS.

NEW GOLD-SAVING PROCES

progress and production of the mines is considered.

The paper is one that must prove of peculiar benefit to the mining fraternity in general and particularly to that portion of it engaged in mining at the camps of Park City, Alta and the tributary region. The different formations are most comprehensively treated and to those still operating with a view to making mines the data given

Consolidated, Tetro and Yankee Consolidated each exhibited weakness and sold under Monday's quotations.

During the day a total of 24.737 shares of stock, with a selling value of \$3.390.37. changed hands. The list of closing quotations and segregated record of sales made was as follows:

Operators Rallied Around Har- Amale Copper.

BEARS ATTACKED U.S. STEEL

CALL MONEY CAN BE HAD FOR THE ASKING.

New York, May 3.—The early stock market today showed some disposition to continue the downward movement which was in force yesterday. The check to the decline had the appearance of a contest waged between opposing factors in the market, and the upward movement was discontinued as soon as the selling was checked. The operators for a decline seemed to center their selling on United States Stgel preferred, while the supporters of the market rallied their efforts upon Union Pacific. Neither movement was explained by any news of the day, and so far as regarded those two stocks seemed to be prompted wholly by the purpose to influence the general market. The general movement was extremely sluggish and narrow. The resumption of trading in London after the holiday with no evidence of weakness by reason of the military events in Asia was a reassuring factor and there was some buying here for London.

better account of the seeding of spring wheat and some development of unfavorable conditions for winter wheat even in the districts which have suffered most.

The early market was very mixed and irregular and rather more active than the recent average. Call money showed a firmer tone arily, and for the first time in many days the minimum rate was 1½ per cent, with loans made above that. This was attributed to the growing influence of the gold exports and to the exigencies of the bidders for the \$37,000,000 New York City bond issue. After the bids were annoted call money broke to ½ of 1 per cent. The time money market was not affected. The statement by J. P. Morgan in Paris clarified the understanding of the method of the Panama canal payment and made clear the position of his firm as the fiscal agent of this government and the methad of the panama canal payment and made clear the position that other of the gold exports than those by the Morgan firm have been connected with the Panama canal payment thus deducting from the furture requirements. The market closed dull and irregular and showed small net changes.

Treasury Statement.

Growing Aches and Pains.

Mrs. Josie Sumner. Bremond, Tex., writes, April 15, 1902: "I have used Ballard's Snow Limiment in my family for three years. I would not be without it in the house... I have used it on my little girl for growing pains and aches in her knees. It cured her right away. I have also used it for frost bitten feet with good success. 'It is the best liniment I ever used.' 25c, 50c, \$1.00.
